

STANDARD OPERATING PROCEDURES

Facility: _____

SUBJECT: SPECIAL TRANSITORY FOOD UNITS (STFU'S) – WASTEWATER DISPOSAL

*** Liquid wastewater (from sinks, ice machines, ice chests, mop water) must be properly disposed of using a sanitary sewer or approved holding tank. Wastewater cannot be dumped into storm drains, waterways or onto the ground.**

The STFU will generate wastewater from the following equipment.

Where will the STFU wastewater be disposed? (list all locations)

* Holding tanks must be sized 15 percent larger in capacity than the water supply tank and sloped to a drain that is 1 inch in inner diameter or greater equipped with a shut-off valve.

What is the size and type (portable or permanent) of the wastewater holding tank?

Who will make sure wastewater disposal procedures are followed?

What records will be maintained and where?
