

Frequently Asked Questions

Q: Who can receive sexual health services?

A: Anyone, regardless of gender, sexual orientation, age, income, or anything else!

Q: What will happen at my appointment?

A: If you're under 21, you won't need a breast or pelvic exam unless there's something you want us to check. Under age 18, you **do not** need your parent's or guardian's consent to receive sexual health services.

A: Your blood pressure, weight, urine, and iron may be checked. If you need a pelvic or breast exam, you'll be seen by a female Nurse Practitioner.

A: You can get tested for sexually transmitted infections (STIs), including HIV. Birth control supplies are issued at the clinic, or by prescription.

Q: What will it cost?

A: We always appreciate a payment or donation, but we won't turn anyone away if they can't pay. We will bill most insurance, including Medicaid and the Healthy Michigan Plan, with your permission. Otherwise, we use a sliding fee scale to determine the cost of services based on income.
