

Information Folders

If your printer can accommodate 11x17 cardstock, it would be possible for you to print your own folders. However, if not a printer can make them for you.

- 1) Decide if you want the one-color folder (everything would be printed in the same color on the front and back) or the four-color folder (everything is printed on one side, in many colors).
- 2) Take this cd in to your printer and tell them which file to use either folder_onecolor.pdf or folder_fourcolor.pdf
- 3) Using these files the printer can print as many folders for you as you like.

The blank space at the bottom front is for you to put your name and contact information. You can either write it in, or print it on a label then stick it on.
